

SURGE PRODUCTS & SERVICES

When electrical storms hit our community, a lightning strike outdoors can damage electronic devices inside.

High West Energy offers our members affordable, professionally installed surge protection services. For \$4.95, \$9.95, or \$12.95 a month, we can protect your appliances and equipment from damage due to a surge upstream from our meter or your service panel.

- Saves money on appliances and devices you have purchased over the years
- It allows only the electricity you need and protects your devices (LED TVs, laptops, appliances, tablets and more) from any trouble that can occur from surges coming in from your meter or service box.

Now more than ever, homes, farms and businesses can benefit from surge protection because more electronics and appliances have circuit boards. Weather, tripped breakers, equipment malfunctions and other incidents can sometimes cause the voltage to spike. Our surge protection service will help prevent these types of peaks.
